

BQ Append API (V2.1)

This API is a powerful tool that delivers Company Firmographic, Financial and Legal Entity level data for 74 Million Organizations doing business in the US.

For detailed documentation on fields and their description, please click [here](#).

- This API allows businesses to leverage up-to-date company information using various valuable data points, such as company name, address, headcount or industry and generate business opportunities, discover industry trends, and unlock market insights.
- The API provides access to a wide range of financial statements, including income statements, balance sheets, and cash flow statements. These statements are crucial for analyzing a company's financial health and performance.
- The API provides information related to corporate family tree structure and compliance checks that help businesses with identity as well as verification of the legal status of the company.

This API enables a client to search for a Company or Legal Entity using input parameters such as:

- Company Name
- Company Address
- Website URL
- Ticker
- EIN
- CIK

Output parameters include Organization

- Firmographics with Headcount and Revenue
- Financials including balance sheet items, cash flow statement and income statement
- Most Recent Employment, Most Recent Payroll
- Legal Entity details, BQ Credit Score, Taxliens et al.

BQ's proprietary search algorithms utilize multiple match methods and sorts the results using a combination of proximity and company size with a preference towards larger companies.

Use Cases for the API:

- Capital Market
- Sales & Marketing
- Compliance and KYB / KYC
- Credit Risk: Insurance & Banking

Please refer to this [Link](#) for detailed Use Cases and Field Names

Authentication Method

The API supports the following authentication method

- Username and Password

API Endpoint

<https://apigateway.brightquery.com/auth/bq-append>

Method: POST

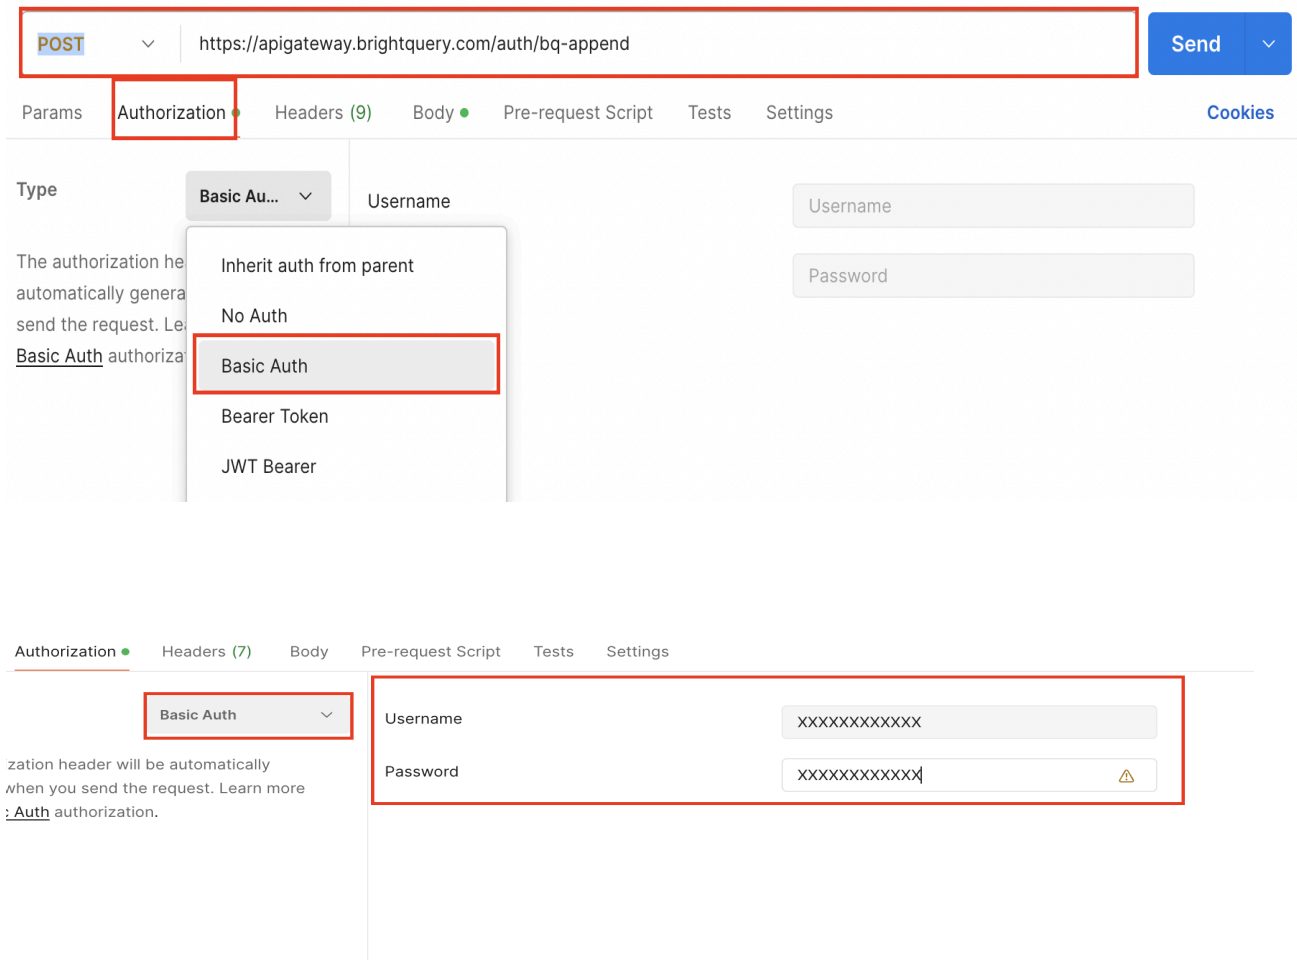

Username and Password authentication

You can use API Endpoint to supply your username and password.

Postman Setup

Below are the step by step process to implement the authentication

1. Select Method as POST and add Endpoint URL as shown in the Image below.
2. Click the Authorization tab below Select Basic Auth as shown in the image below.
3. Supply your Username and Password.

POST | https://apigateway.brightquery.com/auth/bq-append | Send

Params | **Authorization** | Headers (9) | Body | Pre-request Script | Tests | Settings | Cookies

Type: Basic Au... | Username: | Password: |

The authorization header will be automatically generated when you send the request. Learn more about [Basic Auth](#) authorization.

| Firmographics   | bq_organization_legal_name        | String    | Legal name of the Organization                                                                                                                                                                                                                                               |
| Firmographics   | bq_organization_jurisdiction_code | String    | State of jurisdiction for the Legal Entity of the ultimate parent or sole entity that comprises the Organization                                                                                                                                                             |
| Firmographics   | bq_organization_company_number    | String    | Unique number issued by the jurisdiction with which the Legal Entity is registered.                                                                                                                                                                                          |
| Firmographics   | bq_organization_lfo               | String    | Classification of the Legal form of the Organization of the Ultimate parent or Sole entity that comprises the Organization based on whether it is a Corporation, Limited Liability Company, Partnership, Non-Profit Corporation or Non-Profit Organization.                  |
| Firmographics   | bq_organization_date_founded      | String    | Date of formation for the Legal Entity of the ultimate parent or sole entity that comprises the Organization                                                                                                                                                                 |
| Firmographics   | bq_organization_active_indicator  | Int       | Equals 1 if the Organization is active, and 0 otherwise. An Organization is active if one or more of its legal entities is operational or                                                                                                                                    |

|               |                                          |         |                                                                                                                                               |
|---------------|------------------------------------------|---------|-----------------------------------------------------------------------------------------------------------------------------------------------|
|               |                                          |         | active. As a general rule, an Organization is deemed to be active if one of its member entities has filed with an agency in the last 2 years. |
| Firmographics | bq_organization_address1_type            | String  | Classification of the Organization's address based on whether it is a Registered address, Non-Registered address, or Officer address          |
| Firmographics | bq_organization_address1_valid_indicator | Int     | Indicator that equals 1 if the Organization's address is valid based on USPS address verification and 0 otherwise.                            |
| Firmographics | bq_organization_address1_line_1          | String  | 1st line the Organization's Primary address. Addresses are cleaned and standardized using USPS.                                               |
| Firmographics | bq_organization_address1_city            | String  | City of the Organization's Primary address. Addresses are cleaned and standardized using USPS.                                                |
| Firmographics | bq_organization_address1_state           | String  | State of the Organization's Primary address. Addresses are cleaned and standardized using USPS.                                               |
| Firmographics | bq_organization_address1_state_name      | String  | State name of the Organization's Primary address. Addresses are cleaned and standardized using USPS.                                          |
| Firmographics | bq_organization_address1_county_fips     | String  | County-level FIPS code of the Organization's Primary address. Addresses are cleaned and standardized using USPS.                              |
| Firmographics | bq_organization_address1_county_name     | String  | County name of the Organization's Primary address. Addresses are cleaned and standardized using USPS.                                         |
| Firmographics | bq_organization_address1_country         | String  | Country of the Organization's Primary address. Addresses are cleaned and standardized using USPS.                                             |
| Firmographics | bq_organization_address1_zip5            | String  | 5-digit Zip Code of the Organization's Primary address. Addresses are cleaned and standardized using USPS.                                    |
| Firmographics | bq_organization_address1_latitude        | Decimal | Latitude of the Organization's Primary address. Addresses are cleaned and standardized using USPS.                                            |
| Firmographics | bq_organization_address1_longitude       | Decimal | Longitude of the Organization's Primary address. Addresses are cleaned and                                                                    |

|               |                                              |        |                                                                                                                                                                                                                                                   |
|---------------|----------------------------------------------|--------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               |                                              |        | standardized using USPS.                                                                                                                                                                                                                          |
| Firmographics | bq_organization_address1_rdi                 | String | RDI indicates whether the Organization's Primary address is Residential, Commercial or unknown based on USPS reporting.                                                                                                                           |
| Firmographics | bq_organization_address1_cbsa_code           | String | The Core-Based Statistical Area (CBSA) is a 5-digit numeric code which identifies the Metropolitan Statistical Area or Micropolitan Statistical Area in which Organization's Primary address lies according to USPS.                              |
| Firmographics | bq_organization_address1_location            | Dict   | Latitude & Longitude of the Organization's Primary address. Addresses are cleaned and standardized using USPS.                                                                                                                                    |
| Firmographics | bq_organization_address_summary              | String | Organization's Primary address. Addresses are cleaned and standardized using USPS.                                                                                                                                                                |
| Firmographics | bq_organization_website                      | String | Link to the Organization's primary website. A company's website is not typically reported in regulatory filings; therefore, BQ scrapes the Internet to find such links, and consequently the process is subject to error.                         |
| Firmographics | bq_organization_ein                          | String | Unique number issued by the IRS given to the Organization which is used to identify the business and certain other related entities. An organization may have multiple EINs; this is the primary EIN.                                             |
| Firmographics | bq_organization_nonprofit_indicator          | Int    | Indicator that equals 1 if the Organization is a Non-Profit and 0 otherwise.                                                                                                                                                                      |
| Firmographics | bq_organization_public_indicator             | Int    | Indicator that equals 1 if the Organization is Public and 0 otherwise. A company is regarded as public if it trades on a major stock exchange. OTC stocks (pink sheets) are not included.                                                         |
| Firmographics | bq_organization_de_ultimate_parent_indicator | Int    | Indicator that equals 1 if the Organization is a Delaware Ultimate Parent (holding entity) and 0 otherwise. Many large and sophisticated U.S. companies have an ultimate parent legal entity in the State of Delaware for tax and legal purposes. |
| Firmographics | bq_organization_irs_industry_name            | String | The IRS industry name most commonly selected by the Organization in its IRS filings.                                                                                                                                                              |

|               |                                                |        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|---------------|------------------------------------------------|--------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Firmographics | bq_organization_subsector_code                 | String | The IRS sub-sector code corresponding to the IRS industry code most commonly selected by the company in its IRS filings (industries aggregate up to sub-sectors).                                                                                                                                                                                                                                                                                                                                  |
| Firmographics | bq_organization_subsector_name                 | String | Description of the IRS sub-sector corresponding to the IRS industry most commonly selected by the company in its IRS filings (industries aggregate up to sub-sectors).                                                                                                                                                                                                                                                                                                                             |

| Family tree | bq_legal_entity_immediate_children_count      | Int    | Count of the number of children legal entities (if this legal entity is a parent)                                                                                                                          |
| Family tree | bq_legal_entity_children_ids                  | String | Legal entity IDs of the children (if this legal entity is a parent, and includes children of children, etc.).                                                                                              |
| Family tree | bq_legal_entity_children_count                | Int    | Count of the number of children (and grandchildren, etc.) legal entities (if this legal entity is a parent).                                                                                               |
| Family tree | bq_legal_entity_immediate_establishment_ids   | String | IDs of the immediate establishments operated by the Legal Entity.                                                                                                                                          |
| Family tree | bq_legal_entity_immediate_establishment_count | Int    | Count of the number of immediate establishments operated by the Legal Entity.                                                                                                                              |
| Family tree | bq_legal_entity_irs_tax_lien_indicator        | Int    | Indicator that equals 1 if the Legal Entity has a tax lien issued by the IRS, and 0 otherwise.                                                                                                             |
| Family tree | bq_legal_entity_address1_type                 | String | Classification system for the Legal Entity address based on whether it is a Registered address, non-registered address, or officer address                                                                 |
| Family tree | bq_legal_entity_address1_valid_indicator      | Int    | Indicator that equals 1 if the Legal address of the Legal Entity is valid based on USPS address verification and 0 otherwise.                                                                              |
| Family tree | bq_legal_entity_address1_line_1               | String | 1st line the Legal Entity's address. Address of the Legal Entity should match what the entity has filed with the state in its organizational documents. Addresses are cleaned and standardized using USPS. |
| Family tree | bq_legal_entity_address1_city                 | String | City of the Legal Entity's address. Addresses are cleaned and standardized using USPS.                                                                                                                     |
| Family tree | bq_legal_entity_address1_state                | String | State of the Legal Entity's address. Addresses are cleaned and standardized using USPS.                                                                                                                    |
| Family tree | bq_legal_entity_address1_state_name           | String | State name of the Legal Entity's address.                                                                                                                                                                  |

|               |                                      |         |                                                                                                                                                                                                                                |
|---------------|--------------------------------------|---------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | name                                 |         | Addresses are cleaned and standardized using USPS.                                                                                                                                                                             |
| Family tree   | bq_legal_entity_address1_county_fips | String  | County-level FIPS code of the Legal Entity's address. Addresses are cleaned and standardized using USPS.                                                                                                                       |
| Family tree   | bq_legal_entity_address1_county_name | String  | County name of the Legal Entity's address. Addresses are cleaned and standardized using USPS.                                                                                                                                  |
| Family tree   | bq_legal_entity_address1_zip5        | String  | 5-digit Zip Code of the Legal Entity's address. Addresses are cleaned and standardized using USPS.                                                                                                                             |
| Family tree   | bq_legal_entity_address1_latitude    | Decimal | Latitude of the Legal Entity's address. Addresses are cleaned and standardized using USPS.                                                                                                                                     |
| Family tree   | bq_legal_entity_address1_longitude   | Decimal | Longitude of the Legal Entity's address. Addresses are cleaned and standardized using USPS.                                                                                                                                    |
| Family tree   | bq_legal_entity_address1_rdi         | String  | RDI indicates whether the Legal Entity address is Residential, Commercial or unknown based on USPS reporting.                                                                                                                  |
| Family tree   | bq_legal_entity_current_status       | String  | Legal status of the Legal Entity as reported by the jurisdiction (e.g., Dissolved, Delinquent, etc.). There are 690 distinct possible values for legal status.                                                                 |
| Family tree   | bq_legal_entity_active_indicator     | Int     | Indicator that equals 1 if the Legal Entity is active and 0 otherwise. Legal entity active status is derived from current status.                                                                                              |
| Firmographics | bq_organization_linkedin_url         | String  | Link to the Organization's primary LinkedIn URL. A Organization's LinkedIn URL is not reported in regulatory filings; therefore, BQ scrapes the Internet to find such links, and consequently the process is subject to error. |
| Firmographics | bq_organization_crunchbase_url       | String  | Link to the Organization's Crunchbase URL.                                                                                                                                                                                     |
| Firmographics | bq_organization_irs_industry_code    | String  | The IRS industry code most commonly selected by the Organization in its IRS filings.                                                                                                                                           |
| Firmographics | bq_organization_sector_code          | String  | The IRS sector code corresponding to the IRS industry code most commonly selected by                                                                                                                                           |

|               |                                       |        |                                                                                                                                                                                                                                                                                        |
|---------------|---------------------------------------|--------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               |                                       |        | the company in its IRS filings (industries aggregate up to sub-sectors, and sub-sectors aggregate up to sectors).                                                                                                                                                                      |
| Firmographics | bq_organization_sector_name           | String | Description of the IRS sector corresponding to the IRS industry most commonly selected by the company in its IRS filings (industries aggregate up to sub-sectors, and sub-sectors aggregate up to sectors).                                                                            |
| Firmographics | bq_organization_year_founded          | String | Year founded, derived from the date of formation for the Legal Entity of the ultimate parent or sole entity that comprises the Organization                                                                                                                                            |
| Firmographics | bq_business_code                      | String | The IRS industry code most commonly selected by the Organization in its IRS filings.                                                                                                                                                                                                   |
| Firmographics | bq_public_indicator                   | Int    | Indicator that equals 1 if the Organization is Public and 0 otherwise. A company is regarded as public if it trades on a major stock exchange. OTC stocks (pink sheets) are not included.                                                                                              |
| Firmographics | bq_industry_name                      | String | The IRS industry name most commonly selected by the Organization in its IRS filings.                                                                                                                                                                                                   |
| Firmographics | bq_confidence_score                   | Int    | Score given to an Organization that measures BQ's confidence in the veracity of the Organization's record, taking into account the volume and frequency of its filings. The score ranges from 0 to 100.                                                                                |
| Firmographics | bq_organization_ofac_indicator        | Int    | Indicator that equals 1 if the Organization is on the OFAC watchlist of U.S. Treasury, and 0 otherwise. U.S. Treasury publishes the OFAC watchlist which contains names of people and companies that are sanctioned; these are matched to Contacts, Legal Entities, and Organizations. |
| Firmographics | bq_organization_irs_taxlien_indicator | Int    | Indicator that equals 1 if the Organization has a tax lien issued by the IRS, and 0 otherwise.                                                                                                                                                                                         |
| Firmographics | bq_tickers_related                    | String | All TICKERs associated with the Organization if it is publicly listed, such as arising due to                                                                                                                                                                                          |

|                         |                                        |        |                                                                                                                                                                                                                                                                                                                   |
|-------------------------|----------------------------------------|--------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                         |                                        |        | stocks of various classes.                                                                                                                                                                                                                                                                                        |
| Firmographics           | bq_organization_eins_related           | String | EINs associated with the Organization, other than the primary EIN. These may relate to subsidiaries and/or legal entities that are part of the Organization.                                                                                                                                                      |
| Firmographics           | bq_organization_cik                    | String | The Central Index Key (CIK) is a unique number issued by the SEC.                                                                                                                                                                                                                                                 |
| Firmographics           | bq_organization_lei                    | String | Legal Entity Identifier of the Organization. LEIs are issued by Local Operating Units (LOUs) of the Global LEI System. LEIs are generally issued to companies that engage in significant financial transactions.                                                                                                  |
| Firmographics           | bq_organization_legal_address1_line_2  | String | 2nd line of the Organization's Legal address. Addresses are cleaned and standardized using USPS.                                                                                                                                                                                                                  |
| Firmographics           | bq_organization_address1_cbsa_name     | String | Name of the Core-Based Statistical Area (CBSA) which identifies the Metropolitan Statistical Area or Micropolitan Statistical Area in which the Organization's Primary address falls under according to USPS.                                                                                                     |
| Family tree             | bq_legal_entity_address_summary        | String | Address of the Organization's Primary address. Addresses are cleaned and standardized using USPS.                                                                                                                                                                                                                 |
| Firmographics           | bq_organization_legal_address1_summary | String | Classification that indicates whether the Organization's Legal address is Match-Mailable or Non-Mailable based on USPS reporting.                                                                                                                                                                                 |
| Firmographics           | bq_organization_valuation              | Int    | Valuation of the organization.                                                                                                                                                                                                                                                                                    |
| Firmographics           | extracted_on                           | String | Date on which data is extracted from the database.                                                                                                                                                                                                                                                                |
| Financials & Employment | bq_employment_mr                       | Int    | The most recent (MR) count of the number of full-time employees in the U.S. based on Dept. of Labor filings. For companies with employee benefit plans, the current number of employees is defined as those that are eligible for a retirement and/or welfare benefit plan, such as a 401(k) or health insurance. |

|                         |                    |     |                                                                                                                                                                                                                                                                                                                                                                 |
|-------------------------|--------------------|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Financials & Employment | bq_revenue_mr      | Int | Trailing twelve months (TTM) of revenue, calculated from the last 4 quarters. Revenue is based on SEC filings if the company is public, or imputed from IRS filings if the company is private, USD. For companies with multiple establishments, this number is based on the U.S. total.                                                                         |
| Financials & Employment | bq_ebitda_mr       | Int | Trailing twelve months (TTM) of EBITDA, calculated from the last 4 quarters. EBITDA is an indicator of profitability, equal to net income with interest, taxes, depreciation, and amortization added back in. EBITDA is based on SEC filings if the company is public, or imputed from IRS filings if the company is private.                                   |
| Financials & Employment | bq_cor_mr          | Int | Trailing twelve months (TTM) of cost of revenue, calculated from the last 4 quarters. Cost of revenue (COR) is based on SEC filings if the company is public, or imputed from IRS filings if the company is private.                                                                                                                                            |
| Financials & Employment | bq_net_income_mr   | Int | Trailing twelve months (TTM) of net income, calculated from the last 4 quarters. Net income is an indicator of profitability, equal to revenue minus COR, SG&A, operating expenses, depreciation, interest, taxes, and other expenses. Net income is based on SEC filings if the company is public, or imputed from IRS filings if the company is private, USD. |

| Financials & Employment | bq_mortgage_and_real_estate_loans_mr         | Int | A mortgage loan is a loan associated with the purchase of real estate.                                                                                                                                                                                                 |
| Financials & Employment | bq_other_investments_mr                      | Int | Other investments refers to investments that are not included in other categories such as cash, accounts receivable, inventory, and other current assets. For public companies, this equals Total Investments listed on their balance sheet.                           |
| Financials & Employment | bq_buildings_and_other_depreciable_assets_mr | Int | Improvements on owned real estate property such as buildings and Other Depreciable Assets such as computers and software, furniture and fixtures, machinery, and vehicles. For public companies, this equals Property, Plant, and Equipment.                           |
| Financials & Employment | bq_less_accumulated_depreciation_mr          | Int | Value of Buildings and other depreciable assets.                                                                                                                                                                                                                       |
| Financials & Employment | bq_depletable_assets_mr                      | Int | Depletable assets which are typically natural resources that decrease in quantity or value over time, such as oil, gas, minerals, and timber                                                                                                                           |
| Financials & Employment | bq_less_accumulated_depletion_mr             | Int | Accumulated depletion value of depletable assets.                                                                                                                                                                                                                      |
| Financials & Employment | bq_land_mr                                   | Int | Value of the land portion of a real estate investment which can include natural and artificial land improvements. Land does not include building improvements.                                                                                                         |
| Financials & Employment | bq_intangible_assets_amortizable_mr          | Int | Value of intangible assets which are assets that are not physical in nature, but still have value for a business or an individual. They include things like patents, trademarks, copyrights, goodwill, software, and digital assets. For public companies, this equals |

|                         |                                     |     |                                                                                                                                                                                                                                                                                                                                               |
|-------------------------|-------------------------------------|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                         |                                     |     | Goodwill plus Intangible Assets Excluding Goodwill.                                                                                                                                                                                                                                                                                           |
| Financials & Employment | bq_less_accumulated_amortization_mr | Int | Value of Intangible assets with accumulated amortization expensed over their expected useful life.                                                                                                                                                                                                                                            |
| Financials & Employment | bq_other_non_current_assets_mr      | Int | Value of Non-current assets, which are assets and property owned by a business that are not easily converted to cash within a year. They are long-term investments that serve the company for more than a year.                                                                                                                               |
| Financials & Employment | bq_total_liabilities_and_equity_mr  | Int | Total liabilities are all of the companies obligations to third parties. Shareholders equity is the residual interest in the assets of a company after deducting liabilities. The total liabilities and shareholders equity found on the right side of the balance sheet, equals total assets which is on the left side of the balance sheet. |
| Financials & Employment | bq_current_liabilities_mr           | Int | Current liabilities on a balance sheet refer to the debts or obligations that a company owes and is required to settle within one fiscal year or its normal operating cycle. Examples of current liabilities include accounts payable, short-term debt, dividends, and notes payable as well as income taxes owed.                            |
| Financials & Employment | bq_accounts_payable_mr              | Int | Accounts payable is the amount of short-term debt or money owed to suppliers and creditors by a company.                                                                                                                                                                                                                                      |
| Financials & Employment | bq_other_current_liabilities_mr     | Int | Debts or obligations that are due within one year but are not categorized as accounts payable, short-term debt, dividends, and notes payable as well as income taxes owed. For public companies, this equals Current Liabilities minus Accounts Payable minus Short Term Debt.                                                                |
| Financials & Employment | bq_non_current_liabilities_mr       | Int | Noncurrent liabilities, also known as long-term liabilities, are obligations listed on the balance sheet not due for more than a year. Examples of noncurrent liabilities include long-term loans and lease obligations, bonds payable and deferred revenue. For                                                                              |

|                         |                                     |       |                                                                                                                                                                                                                   |
|-------------------------|-------------------------------------|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                         |                                     |       | public companies, this equals Total Liabilities minus Current Liabilities.                                                                                                                                        |
| Financials & Employment | bq_loans_from_shareholders_mr       | Int   | A loan from shareholder is debt-like financing provided from a shareholder to the company. Typically, shareholder loans are converted to equity and may be excluded in debt ratios for assessing financial risks. |
| Financials & Employment | bq_other_non_current_liabilities_mr | Int   | Debts or obligations that are due within one year but are not categorized as accounts payable, short-term debt, dividends, and notes payable as well as income taxes owed.                                        |
| Financials & Employment | bq_shareholders_equity_mr           | Int   | Shareholders equity is the residual interest in the assets of a company after deducting liabilities. For public companies, this equals Total Assets minus Total Liabilities.                                      |
| Financials & Employment | bq_revenue_growth_yoy_mr            | Float | Year over year (YoY) growth rate of revenue based on annual numbers, e.g. 2022 vs. 2021                                                                                                                           |

## Legal Entities

### Input Params

| Parameters   | DataType | Description                    |
|--------------|----------|--------------------------------|
| company_name | String   | Legal name of the Legal Entity |

Response Data

Number of records per hit is 10.

Records are sorted by revenue and employees headcount

Parameter Group	Parameters	Data Type	Description
Firmographics	bq_organization_id	String	Unique ID of Organization
Firmographics	bq_organization_structure	String	Multi-entity U.S. organization (a collection of legal entities with an ultimate parent in the U.S.); Multi-entity non-U.S. organization (a collection of legal entities with an ultimate parent outside the U.S.); or Single-entity organization (consists of a sole entity)
Firmographics	bq_organization_name	String	Primary, most common name of the Organization, which equals the name of the ultimate parent or sole entity that comprises the Organization

Firmographics	bq_organization_legal_name	String	Legal name of the Organization
Firmographics	bq_organization_jurisdiction_code	String	State of jurisdiction for the Legal Entity of the ultimate parent or sole entity that comprises the Organization
Firmographics	bq_organization_company_number	String	Unique number issued by the jurisdiction with which the Legal Entity is registered.
Firmographics	bq_organization_lfo	String	Classification of the Legal form of the Organization of the Ultimate parent or Sole entity that comprises the Organization based on whether it is a Corporation, Limited Liability Company, Partnership, Non-Profit Corporation or Non-Profit Organization.
Firmographics	bq_organization_date_founded	String	Date of formation for the Legal Entity of the ultimate parent or sole entity that comprises the Organization
Firmographics	bq_organization_active_indicator	Int	Equals 1 if the Organization is active, and 0 otherwise. An Organization is active if one or more of its legal entities is operational or active. As a general rule, an Organization is deemed to be active if one of its member entities has filed with an agency in the last 2 years.
Firmographics	bq_organization_address_1_type	String	Classification of the Organization's address based on whether it is a Registered address, Non-Registered address, or Officer address
Firmographics	bq_organization_address_1_valid_indicator	Int	Indicator that equals 1 if the Organization's address is valid based on USPS address verification and 0 otherwise.
Firmographics	bq_organization_address_1_line_1	String	1st line the Organization's Primary address. Addresses are cleaned and standardized using USPS.
Firmographics	bq_organization_address_1_city	String	City of the Organization's Primary address. Addresses are cleaned and standardized using USPS.
Firmographics	bq_organization_address_1_state	String	State of the Organization's Primary address. Addresses are cleaned and standardized using USPS.
Firmographics	bq_organization_address	String	State name of the Organization's Primary

	1_state_name		address. Addresses are cleaned and standardized using USPS.
Firmographics	bq_organization_address 1_county_fips	String	County-level FIPS code of the Organization's Primary address. Addresses are cleaned and standardized using USPS.
Firmographics	bq_organization_address 1_county_name	String	County name of the Organization's Primary address. Addresses are cleaned and standardized using USPS.
Firmographics	bq_organization_address 1_country	String	Country of the Organization's Primary address. Addresses are cleaned and standardized using USPS.
Firmographics	bq_organization_address 1_zip5	String	5-digit Zip Code of the Organization's Primary address. Addresses are cleaned and standardized using USPS.
Firmographics	bq_organization_address 1_latitude	Decimal	Latitude of the Organization's Primary address. Addresses are cleaned and standardized using USPS.
Firmographics	bq_organization_address 1_longitude	Decimal	Longitude of the Organization's Primary address. Addresses are cleaned and standardized using USPS.
Firmographics	bq_organization_address 1_rdi	String	RDI indicates whether the Organization's Primary address is Residential, Commercial or unknown based on USPS reporting.
Firmographics	bq_organization_address 1_cbsa_code	String	The Core-Based Statistical Area (CBSA) is a 5-digit numeric code which identifies the Metropolitan Statistical Area or Micropolitan Statistical Area in which Organization's Primary address lies according to USPS.
Firmographics	bq_organization_address 1_location	Dict	Latitude & Longitude of the Organization's Primary address. Addresses are cleaned and standardized using USPS.
Firmographics	bq_organization_address _summary	String	Organization's Primary address. Addresses are cleaned and standardized using USPS.
Firmographics	bq_organization_website	String	Link to the Organization's primary website. A company's website is not typically reported in regulatory filings; therefore, BQ scrapes the Internet to find such links, and consequently the process is subject to error.

Firmographics	bq_organization_ein	String	Unique number issued by the IRS given to the Organization which is used to identify the business and certain other related entities. An organization may have multiple EINs; this is the primary EIN.
Firmographics	bq_organization_nonprofit_indicator	Int	Indicator that equals 1 if the Organization is a Non-Profit and 0 otherwise.
Firmographics	bq_organization_public_indicator	Int	Indicator that equals 1 if the Organization is Public and 0 otherwise. A company is regarded as public if it trades on a major stock exchange. OTC stocks (pink sheets) are not included.
Firmographics	bq_organization_de_ultimate_parent_indicator	Int	Indicator that equals 1 if the Organization is a Delaware Ultimate Parent (holding entity) and 0 otherwise. Many large and sophisticated U.S. companies have an ultimate parent legal entity in the State of Delaware for tax and legal purposes.
Firmographics	bq_organization_irs_industry_name	String	The IRS industry name most commonly selected by the Organization in its IRS filings.
Firmographics	bq_organization_subsector_code	String	The IRS sub-sector code corresponding to the IRS industry code most commonly selected by the company in its IRS filings (industries aggregate up to sub-sectors).
Firmographics	bq_organization_subsector_name	String	Description of the IRS sub-sector corresponding to the IRS industry most commonly selected by the company in its IRS filings (industries aggregate up to sub-sectors).
Firmographics	bq_organization_naics_code	String	The NAICS industry code most commonly reported by the Organization in regulatory filings.
Firmographics	bq_organization_naics_name	String	The NAICS industry name most commonly reported by the Organization in regulatory filings.
Firmographics	bq_organization_naics_sector_code	String	The NAICS sector code most commonly reported by the Organization in regulatory filings. Industries roll up to sectors.
Firmographics	bq_organization_naics_sector_name	String	The NAICS sector name most commonly

	ctor_name		reported by the Organization in regulatory filings. Industries roll up to sectors.
Firmographics	bq_organization_company_type	String	Classification system for the Organization based on whether it is an Employer, Non-Employer, Sole Proprietor, or a Holding Company. An Employer has full-time W-2 employees in the U.S. A Non-Employer is an operating business without full-time employees. A Sole Proprietor is a micro business without full-time employees that often operates from a residential address. A Holding Company is not engaged in economic activity, and is often used for real estate and financial transactions
Firmographics	bq_organization_legal_address1_type	String	Classification of the Organization's Legal address based on whether it is a Registered address, Non-Registered address, or Officer address
Firmographics	bq_organization_legal_address1_valid_indicator	Int	Indicator that equals 1 if the Organization's Legal address is valid based on USPS address verification and 0 otherwise.
Firmographics	bq_organization_legal_address1_line_1	String	1st line of the Organization's Legal address. Addresses are cleaned and standardized using USPS.
Firmographics	bq_organization_legal_address1_city	String	City of the Organization's Legal address. Addresses are cleaned and standardized using USPS.
Firmographics	bq_organization_legal_address1_state	String	State of the Organization's Legal address. Addresses are cleaned and standardized using USPS.
Firmographics	bq_organization_legal_address1_zip5	String	5-digit Zip Code of the Organization's Legal address. Addresses are cleaned and standardized using USPS.
Firmographics	bq_organization_legal_address1_zip_type	String	Zip code classification of the Organization's Legal address stating whether it is a P.O. Box or not. Addresses are cleaned and standardized using USPS.
Firmographics	bq_organization_legal_address1_rdi	String	RDI indicates whether the Organization's Legal address is Residential, Commercial or unknown based on USPS reporting.

Firmographics	bq_score	String	Score given to an Organization that measures its financial health based on its current and historical financial performance. The calculation is based on traditional financial statement analysis, and incorporates industry benchmarks to assess whether the Organization is outperforming or underperforming relative to its industry peers. The score ranges from 0 to 1000.
Firmographics	bq_sp500_indicator	Int	Indicator that equals 1 if the Organization is a member of the S&P 500 and 0 otherwise.
Family tree	bq_legal_entity_id	String	Unique ID of the Legal Entity. A Legal Entity is part of an Organization and is registered with the Secretary of State of a jurisdiction.
Family tree	bq_legal_entity_name	String	Legal name of the Legal Entity
Family tree	bq_legal_entity_jurisdiction_code	String	Jurisdiction code (2-digit state name) in which the Legal Entity is registered, typically with the Secretary of State.
Family tree	bq_legal_entity_parent_status	String	Ultimate Parent (not a child); Non-U.S. Parent; Child (not a parent); Parent and Child; or Sole (a legal entity is a sole entity if it has no parent or children)
Family tree	bq_legal_entity_immediate_children_ids	String	Legal entity IDs of the immediate children (if this legal entity is a parent)
Family tree	bq_legal_entity_immediate_children_count	Int	Count of the number of children legal entities (if this legal entity is a parent)
Family tree	bq_legal_entity_children_ids	String	Legal entity IDs of the children (if this legal entity is a parent, and includes children of children, etc.).
Family tree	bq_legal_entity_children_count	Int	Count of the number of children (and grandchildren, etc.) legal entities (if this legal entity is a parent).
Family tree	bq_legal_entity_immediate_establishment_ids	String	IDs of the immediate establishments operated by the Legal Entity.
Family tree	bq_legal_entity_immediate_establishment_count	Int	Count of the number of immediate establishments operated by the Legal Entity.
Family tree	bq_legal_entity_irs_taxlie	Int	Indicator that equals 1 if the Legal Entity has

	n_indicator		a tax lien issued by the IRS, and 0 otherwise.
Family tree	bq_legal_entity_address1_type	String	Classification system for the Legal Entity address based on whether it is a Registered address, non-registered address, or officer address
Family tree	bq_legal_entity_address1_valid_indicator	Int	Indicator that equals 1 if the Legal address of the Legal Entity is valid based on USPS address verification and 0 otherwise.
Family tree	bq_legal_entity_address1_line_1	String	1st line the Legal Entity's address. Address of the Legal Entity should match what the entity has filed with the state in its organizational documents. Addresses are cleaned and standardized using USPS.
Family tree	bq_legal_entity_address1_city	String	City of the Legal Entity's address. Addresses are cleaned and standardized using USPS.
Family tree	bq_legal_entity_address1_state	String	State of the Legal Entity's address. Addresses are cleaned and standardized using USPS.
Family tree	bq_legal_entity_address1_state_name	String	State name of the Legal Entity's address. Addresses are cleaned and standardized using USPS.
Family tree	bq_legal_entity_address1_county_fips	String	County-level FIPS code of the Legal Entity's address. Addresses are cleaned and standardized using USPS.
Family tree	bq_legal_entity_address1_county_name	String	County name of the Legal Entity's address. Addresses are cleaned and standardized using USPS.
Family tree	bq_legal_entity_address1_zip5	String	5-digit Zip Code of the Legal Entity's address. Addresses are cleaned and standardized using USPS.
Family tree	bq_legal_entity_address1_latitude	Decimal	Latitude of the Legal Entity's address. Addresses are cleaned and standardized using USPS.
Family tree	bq_legal_entity_address1_longitude	Decimal	Longitude of the Legal Entity's address. Addresses are cleaned and standardized using USPS.
Family tree	bq_legal_entity_address1_rdi	String	RDI indicates whether the Legal Entity address is Residential, Commercial or unknown based on USPS reporting.

Family tree	bq_legal_entity_current_status	String	Legal status of the Legal Entity as reported by the jurisdiction (e.g., Dissolved, Delinquent, etc.). There are 690 distinct possible values for legal status.
Family tree	bq_legal_entity_active_indicator	Int	Indicator that equals 1 if the Legal Entity is active and 0 otherwise. Legal entity active status is derived from current status.
Firmographics	bq_organization_linkedin_url	String	Link to the Organization's primary LinkedIn URL. A Organization's LinkedIn URL is not reported in regulatory filings; therefore, BQ scrapes the Internet to find such links, and consequently the process is subject to error.
Firmographics	bq_organization_crunchbase_url	String	Link to the Organization's Crunchbase URL.
Firmographics	bq_organization_irs_industry_code	String	The IRS industry code most commonly selected by the Organization in its IRS filings.
Firmographics	bq_organization_sector_code	String	The IRS sector code corresponding to the IRS industry code most commonly selected by the company in its IRS filings (industries aggregate up to sub-sectors, and sub-sectors aggregate up to sectors).
Firmographics	bq_organization_sector_name	String	Description of the IRS sector corresponding to the IRS industry most commonly selected by the company in its IRS filings (industries aggregate up to sub-sectors, and sub-sectors aggregate up to sectors).
Firmographics	bq_organization_year_founded	String	Year founded, derived from the date of formation for the Legal Entity of the ultimate parent or sole entity that comprises the Organization
Firmographics	bq_business_code	String	The IRS industry code most commonly selected by the Organization in its IRS filings.
Firmographics	bq_public_indicator	Int	Indicator that equals 1 if the Organization is Public and 0 otherwise. A company is regarded as public if it trades on a major stock exchange. OTC stocks (pink sheets) are not included.

Firmographics	bq_industry_name	String	The IRS industry name most commonly selected by the Organization in its IRS filings.
Firmographics	bq_confidence_score	Int	Score given to an Organization that measures BQ's confidence in the veracity of the Organization's record, taking into account the volume and frequency of its filings. The score ranges from 0 to 100.
